(54) FINE-STRUCTURE TOTAL REFLECTION PRISM MIRROR

(57)Abstract:

PURPOSE: To provide an inexpensive prism mirror capable of being obtained only by a forming process without coating the rear with metal by serrating a high-refractive-index plate, etc., and totally reflecting light by the rear.

CONSTITUTION: An incident light 6 is passed through a mirror front 3, totally reflected by a first total reflection surface and then totally reflected by a second total reflection surface 2 to greet the eyes 5 of a person. The width of the first total reflection surface 1 and second total reflection surface 2 is made very small.
